What are the Russell/Nomura Japan Equity Indexes?

The Russell/Nomura Japan Equity Indexes are Japanese equity indexes developed jointly by US-based Russell Investments and the Quantitative Research Center, Nomura Securities Co., Ltd.

Russell/Nomura Japan Equity Indexes have the following characteristics:

- They represent the entire Japanese equity market in that component stocks are selected from among all listed stocks.
- They reflect the stocks that are actually available for investment, as stable shareholdings are excluded from market capitalization figures.
- There are subindexes for different sizes of company based on market capitalization.
- There are subindexes for growth and value stocks. Subindexes for growth and value stocks are based on P/B ratios adjusted for unrealized gains/losses on marketable securities and unrecognized retirement benefit obligations.
- The Prime Index consists of the top 1,000 stocks in the Total Market Index by market cap excluding stable shareholdings.
- Clear definitions mean that there is no arbitrariness in stock-selection methods.
- The composition of each index is reviewed once a year.

Explanation of Nomura's equity research rating system in Europe, Middle East and Africa, US and Latin America for ratings published from 27 October 2008:

The rating system is a relative system indicating expected performance against a specific benchmark identified for each individual stock. Analysts may also indicate absolute upside to price target defined as (fair value - current price)/current price, subject to limited management discretion. In most cases, the fair value will equal the analyst's assessment of the current intrinsic fair value of the stock using an appropriate valuation methodology such as discounted cash flow or multiple analysis, etc.

Stocks:

- A rating of "1", or "**Buy**", indicates that the analyst expects the stock to outperform the Benchmark over the next 12 months.
- A rating of "2", or "**Neutral**", indicates that the analyst expects the stock to perform in line with the Benchmark over the next 12 months.
- A rating of "3", or "**Reduce**", indicates that the analyst expects the stock to underperform the Benchmark over the next 12 months.
- A rating of "**RS-Rating Suspended**", indicates that the rating and target price have been suspended temporarily to comply with applicable regulations and/or firm policies in certain circumstances including when Nomura is acting in an advisory capacity in a merger or strategic transaction involving the company.

Benchmarks are as follows: **United States/Europe**: Please see valuation methodologies for explanations of relevant benchmarks for stocks (accessible through the left hand side of the Nomura Disclosure web page: <http://www.nomura.com/research>); **Global Emerging Markets (ex-Asia)**: MSCI Emerging Markets ex-Asia, unless otherwise stated in the valuation methodology.

Sectors:

A "**Bullish**" stance, indicates that the analyst expects the sector to outperform the Benchmark during the next 12 months.

A "**Neutral**" stance, indicates that the analyst expects the sector to perform in line with the Benchmark during the next 12 months.

A "**Bearish**" stance, indicates that the analyst expects the sector to underperform the Benchmark during the next 12 months.

Benchmarks are as follows: **United States**: S&P 500; **Europe**: Dow Jones STOXX® 600; **Global Emerging Markets (ex-Asia)**: MSCI Emerging Markets ex-Asia.

Explanation of Nomura's equity research rating system for Asian companies under coverage ex Japan published from 30 October 2008 and in Japan from 6 January 2009:

Stocks:

Stock recommendations are based on absolute valuation upside (downside), which is defined as $(\text{Price Target} - \text{Current Price}) / \text{Current Price}$, subject to limited management discretion. In most cases, the Price Target will equal the analyst's 12-month intrinsic valuation of the stock, based on an appropriate valuation methodology such as discounted cash flow, multiple analysis, etc.

- A "**Buy**" recommendation indicates that potential upside is 15% or more.
- A "**Neutral**" recommendation indicates that potential upside is less than 15% or downside is less than 5%.
- A "**Reduce**" recommendation indicates that potential downside is 5% or more.
- A rating of "**RS**" or "**Rating Suspended**" indicates that the rating and target price have been suspended temporarily to comply with applicable regulations and/or firm policies in certain circumstances including when Nomura is acting in an advisory capacity in a merger or strategic transaction involving the subject company.
- Stocks labelled as "**Not rated**" or shown as "**No rating**" are not in Nomura's regular research coverage.

Sectors:

A "**Bullish**" rating means most stocks in the sector have (or the weighted average recommendation of the stocks under coverage is) a positive absolute recommendation.

A "**Neutral**" rating means most stocks in the sector have (or the weighted average recommendation of the stocks under coverage is) a neutral absolute recommendation.

A "**Bearish**" rating means most stocks in the sector have (or the weighted average recommendation of the stocks under coverage is) a negative absolute recommendation.

Explanation of Nomura's equity research rating system for Asian companies under coverage ex Japan published prior to 30 October 2008:

Stocks:

Stock recommendations are based on absolute valuation upside (downside), which is defined as (Fair Value - Current Price)/Current Price, subject to limited management discretion. In most cases, the Fair Value will equal the analyst's assessment of the current intrinsic fair value of the stock using an appropriate valuation methodology such as Discounted Cash Flow or Multiple analysis etc. However, if the analyst doesn't think the market will revalue the stock over the specified time horizon due to a lack of events or catalysts, then the fair value may differ from the intrinsic fair value. In most cases, therefore, our recommendation is an assessment of the difference between current market price and our estimate of current intrinsic fair value. Recommendations are set with a 6-12 month horizon unless specified otherwise. Accordingly, within this horizon, price volatility may cause the actual upside or downside based on the prevailing market price to differ from the upside or downside implied by the recommendation.

- A "**Strong buy**" recommendation indicates that upside is more than 20%.
- A "**Buy**" recommendation indicates that upside is between 10% and 20%.
- A "**Neutral**" recommendation indicates that upside or downside is less than 10%.
- A "**Reduce**" recommendation indicates that downside is between 10% and 20%.
- A "**Sell**" recommendation indicates that downside is more than 20%.

Sectors:

A "**Bullish**" rating means most stocks in the sector have (or the weighted average recommendation of the stocks under coverage is) a positive absolute recommendation.

A "**Neutral**" rating means most stocks in the sector have (or the weighted average recommendation of the stocks under coverage is) a neutral absolute recommendation.

A "**Bearish**" rating means most stocks in the sector have (or the weighted average recommendation of the stocks under coverage is) a negative absolute recommendation.

Price targets

Price targets, if discussed, reflect in part the analyst's estimates for the company's earnings. The achievement of any price target may be impeded by general market and macroeconomic trends, and by other risks related to the company or the market, and may not occur if the company's earnings differ from estimates.
